

DOLPHON® CC-1080 L

High mechanical stress resistant polyester resin.
Solventless with Styren monomer. Strong homologations on trickle process on any low voltage motors domestic appliances application

Key Properties

Very fast curing cycles
Good bond strength at elevated temperature
Good impregnation of fine wire size
Free of solvents: non-bubbling, maximum filling

Details

Chemical Base	Polyester
Viscosity 23°C	42-52 seconds (FORD Cup4)
Application	Rotating Machines < 1kV
